

Fats and Oils Analytical Testing

Intertek's years of experience and expertise in Fats and Oils will help ensure that your product meets the export and import regulations of your customer. Whether it is a simple analysis of edible oil or the complex analysis of feedstock for Biodiesel, Intertek can be counted on to provide your analysis in a first class, professional manner.

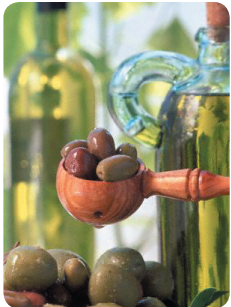

Fat and Oils Analytical Services that Intertek can offer are:

- Fatty Acid Profile
- Pesticide Residues
- Purity Testing
- Sterols
- Triglycerides
- Heavy Metals

If you are using Fats & Oils as feedstock in Biodiesel, Intertek can provide you with a one stop solution, as we can test all the stages of the Biodiesel process from Feedstock to Biodiesel to the end by-product. Laboratory results by Intertek at all stages of the Biodiesel process can help you identify problems and take correction measures to ensure that your product meets specification.

How do you find out if your Olive Oil meets grade and purity requirements? Send a sample to Intertek. Using only industry approved methods, Intertek's team of olive oil experts can help with your quality specifications. Intertek participates in AOCS Round Robin testing and is a member of the North American Olive Oil Council.
