

## Intertek ETL SEMKO: Workforce Solutions for Technical Expertise

Skilled technical and engineering staff are important to the success of your business. Intertek is experienced in successfully running critical analytical testing and engineering projects. We can provide improvements in service and help lower capital investment and operational costs. Our team of experts provide customers with lab services engineered to meet your requirements with accuracy, reliability and economy.

Intertek will serve as your partner in workforce and staffing solutions. Technical staffing provided by Intertek gives our customers value-added service and enhanced quality, all at a lower total cost. It offers financial, operational, quality and productivity benefits to your business.

### Proven Success

We consult with customers in the automotive, medical furniture, consumer products and other industries to design and implement an effective win-win staffing solution. Intertek has a proven track-record providing technical staff for major global companies.

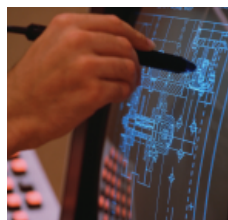

A company that is forced to "over-hire" internally to meet peaks in client demands may have to take drastic down-sizing measures during slow periods. Companies that are required to run "lean" may lose an opportunity because a "spike" in the activity cannot be adequately addressed.

Intertek has provided technical personnel to meet a client's urgent peak needs with less than 24 hours notice.

As the peak needs stabilize or the volume of activity decreases, the reduction in Intertek activity is promptly adjusted without adverse effects on a client's employees.

If your company has a variable workforce need, Intertek offers a cost-effective solution to this challenge.

- Maximize Productivity
- Lower Overhead Costs
- Minimize Unapplied Time
- Retain Talent

### Put Intertek To Work for You

We are ready to work with your company to ensure technical staffing services meet or exceed your expectations. Whether you need staff for a day, a week, a month or longer, Intertek will provide the solution that best fits your organization's needs.
