

EU Packaging Services

Intertek Ageus Solutions' comprehensive services assist you in achieving compliance with *EU Directive on Packaging and Packaging Waste (94/62/EC)* requirements. Through extensive consulting, registration, and recycling services for product packaging **Intertek Ageus Solutions** helps you efficiently and successfully meet your EU Packaging responsibilities.

Compliance with the EU Directive on Packaging and Packaging Waste is mandatory for the sale of packaged products in the EU

The *Directive on Packaging and Packaging Waste* mandates that EU Member States establish collection and disposal systems for packaging and packaging waste. All packaging placed on the market in the Community and all packaging waste, whether it is used or released at industrial, household or any other level, regardless of the material used, as well as restrictions on heavy metals in packaging are covered by this directive. Companies are required to comply with EU Packaging Responsibilities in order to avoid shipping barriers upon import into any of the 27 EU Member States.

“The operators in the packaging chain as a whole should shoulder their shared responsibility to ensure that the environmental impact of packaging and packaging waste throughout its life cycle is reduced as far as possible.”

- EU Directive 2004/12/EC, amending 94/62/EC “on packaging and packaging waste”

Leveraging expertise in national and global environmental compliance, **Intertek Ageus Solutions** will provide:

- Determination of packaging compliance requirements
- Registration with responsible body for each Member State
- Implementation of collection and recycling system
- Identification of ongoing reporting requirements
- Consulting and support

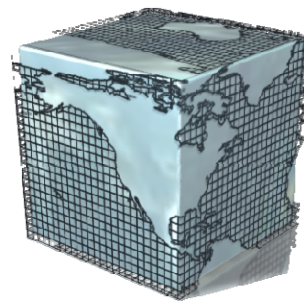

Let **Intertek Ageus Solutions** guide your EU strategy for product packaging compliance.

Determination of Packaging Compliance Requirements

- Analysis of product packaging, market-space and sales methods
- Determination of associated packaging responsibilities and financial obligations
- Identification of applicable material and chemical restrictions
- Guidance on packaging labelling and documentation

Registration with Responsible Body for each Member State

- Analysis of sales models and sales activities to determine regional responsibilities
- Registration of client with the responsible authorities in each country

Implementation of Collection and Recycling System

- Identification of optimal collection and recycling system, extending to the municipal level, for each region in which the client has packaging responsibilities
- Implementation of WEEE collection and treatment

Identification of Ongoing Reporting Requirements

- Collect data and prepare sales and collection reports
- Send required reports to Responsible Authorities and recycling systems as required for packaging directive compliance

Consulting & Support

- Complete project management
- Q&A support
- Corporate education
- On-going support and updates
